DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the abstract is too long it should be only 150 words. Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claims 29-38 are objected to because of the following informalities:
 - a. Claims 29-38 recite the term "craftsman's tool" which is a possible trademark conflict with the sear trademark "craftsman's tools". Applicant should delete the term "craftsman" from the claims.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 29-35 & 37-41 & 49-50 are rejected under 35 U.S.C. 102(b) as being anticipated by Glaser (4744552).

Glaser discloses the invention claimed in claims 29-35 & 37-41 & 49-50 and element 66 is the key.

Allowable Subject Matter

6. Claims 1-28 are allowed.
7. Claims 36 and 42-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wong and Oetlinger et al disclose a device.
